- Quick and easy to inflate that requires no power once inflated.
 - 1200w electric pump required.
- Supplied with guide ropes and pegs to secure your arch to the ground.

ASSEMBLY STEPS

1

Identify the correct staking products required for setup.

2

Lay out the product fully on a flat, clear surface.

3

Check that all valves are tightly closed before inflating.

4

Begin inflation, making sure there is enough space around the product.

5

Inflate each section using all designated valves.

6

Secure the product to the ground using ropes and hooks.
