

Flex Banner Flags

Sizes Available:

Small
Medium

Important info:

- Ground spikes or heavy weights required
- Comes in side zip carry bag for easy transportation

ASSEMBLY STEPS

1

Lay out all components to ensure everything is present before assembly.

2

Connect the thinner poles together to form one long, straight flag pole.

3

Slide the graphic onto the assembled flag pole, carefully feeding it through the pole pocket.

4

Continue pulling the graphic along until the entire pole is fully inserted.

5

Slot each end of the now-graphiced flag pole onto the wider ground poles. Attach the graphic to the flag clip adjuster to hold it in place.

6

Gently bend the assembled structure into your semi-circle shape. Do not bend beyond the intended curve as this may cause the poles to snap.* Now add your weights and you're display is ready

* Please note: The seller is not liable for any damage caused by over bending or misuse of this product.
